

## HOW TO USE

Dilute with water and apply weekly from the first sign of blossoms up to one week before harvest. Use lower rates for younger plants and increase with plant maturity.

Because our products are 100% natural, there are a broad range of application rates that will vary depending on crop type, plant maturity, nutrient requirement and application methods.

## INSTRUCTIONS

**SHAKE WELL** before use. Mix only what you need for one application at a time.

### FOLIAR SPRAY

Mix 5-25 ml with 1 liter of water, or 0.5-2.5 L with 100 L of water per acre. Spray both sides of the leaves.

### SOIL DRENCH

Mix 10-30 ml with 1 liter of water, or 1-3 L in 100 L of water per acre.

### DRIP IRRIGATION

Apply after rain, or water first to help the soil absorb. Mix 1.5-4 L in 100 L of water per acre.
