

SOJA GROW

BIOSTIMULANT

BOOST PLANT HEALTH AND YIELDS NATURALLY

Soja Grow is a powerful amino acid biostimulant designed to supercharge your plants' health and productivity. It provides a readily available source of essential amino acids, the building blocks of proteins, which are critical for plant growth, stress tolerance, and nutrient uptake.

ENHANCED GROWTH: Soja Grow promotes stronger cell walls, leading to more vigorous vegetative growth and higher yields.

IMPROVED STRESS TOLERANCE: By supporting protein synthesis, Soja Grow helps plants better withstand environmental stresses like drought, heat, and disease.

INCREASED NUTRIENT UPTAKE: Soja Grow encourages the development of a robust root system, improving nutrient uptake efficiency.

Made with 100% natural ingredients, Soja Grow is a safe and effective solution for farmers to:

- ☺ INCREASE CROP YIELDS
- ☺ ENHANCE PLANT HEALTH
- ☺ ALLEVIATE ABIOTIC STRESS

INSTRUCTIONS

Dilute with rain water and apply every 7-14 days. Use lower rates for early plant growth and increase with plant maturity. Usage rates will vary depending on the crop, nutrient requirement, soil conditions and frequency of application. We encourage users to conduct their own testing best suited for their crop, soil conditions, and environments.

1 LITER

5 LITERS

INGREDIENTS

Fish Hydrolysate	83.5%
Moringa Leaf Extract	12.5%
Seaweed Oligosaccharides	3.0%
Phosphoric Acid	1.0%
TOTAL	100.0%

GUARANTEED ANALYSIS

Nitrogen	1.36 g/L
Phosphate	5.78 g/L
Potassium	1.39 g/L
pH	4.0 ± 0.5

MADE IN JAMAICA W.I.

GENERAL USAGE RATES	ML/L	TBSP/GAL	SHAKE WELL BEFORE USE
SEEDLINGS & TRANSPLANTS	3-6 ml/L	0.75-1.5 tbsp/gal	START WITH LOWEST RATE
FOLIAR SPRAY	5-20 ml/L 0.5-2 L/100 L	1.25-5 tbsp/gal 0.5-2 gal/100 gal	SPRAY BOTH SIDES OF THE LEAVES
SOIL DRENCH & DRIP IRRIGATION	10-40 ml/L 1-4 L/100 L	2.5-10 tbsp/gal 1-4 gal/100 gal	WATER FIRST TO HELP SOIL ABSORB
