SOJA GROW BIOSTIMULANT

HOW TO USE

Dilute with water and apply every 7-14 days from seedling to the first sign of blossoms.

Because our products are 100% natural, there are a broad variety of applications, rates, and methods. Use lower rates for early plant growth and increase rates with plant maturity.

INSTRUCTIONS

SHAKE WELL

before use. Mix only what you need for one application at a time.

SEED GERMINATION

Mix 10-20 ml with 1 L of water to spray seeds before planting.

SEEDLINGS

Mix 12.5-20 ml with 1 L of water, or 1.25-2 L in 100 L of water per acre.

FOLIAR SPRAY

Mix 12.5-40 ml with 1 L of water, or 1.25-4 L in 100 L of water per acre.

Apply early morning or evening to both sides of the leaves.

SOIL DRENCH

Mix 20-60 ml with 1 L of water, or 2-6 L with 100 L of water per acre.

DRIP IRRIGATION

Apply after rain or water first to help soil absorb. Mix 2-8 L with 100 L of water per acre.

Flush lines with water after each application.
